Executive summary:

A web developer and designer with a special passion for coding and IT. Seeking a job as a front-end or back-end developer with knowledge and practical skills in MERNG stack and database work. I have just graduated from George Washington University's bootcamp in full stack web development, and am excited to start entering the programming field after 9 years of being a journalist and translator.

Technical skills

- JavaScript (Vanilla JS, JQuery, React)
- MERN stack
- CSS (Materialize, Bootstrap, React Bootstrap)
- HTML (Semantic HTML)
- Python (libraries: Matplot, Seaborn)
- MySql database
- GraphQl
- Tableau
- Git and Github
- Microsoft Office (Word, Excel, PowerPoint and Access)
